

Sprint 4 Review meeting:

Date: 05 May 2021

Time: 21:40

Attendees: Ammarah Akhalwaya

Florance Thobejane

Oratile Marope

Nthabiseng Mapheelle

Thokozani Msezane

1. What went well:

- Sprint deadline was met.
- More tests were added to code to verify expected behaviour.
- Integration of code was seamless.

2. Functionality Added:

- Users are able to create groups on the createdGroup table, as well as add course they are taking on the courses table.
- When you create a new group, it is saved to the existing group table and you should be directed to the created group page. A user cannot leave a group they have already left.
- When trying to create a group that is existing, you will be redirected to the groups page (and for now, notified via console).
- Flash messages are displayed on the sign in- and sign-up forms to notify users of incomplete or incorrectly filled in details.
- User is able to request face to face meeting with group members.
- Users can add resource links on the group chat.

3. Problems Encountered and How they Were Solved:

- Some sprint tasks were under estimated and will have to be cut down and carried over into the next sprint.
- Problems with linking browserify and multiple bundles. The solutions for this will be sourced in the next sprint.
- Problems with updating web pages based on data stored in the database tables. Solution will be sourced in the next sprint.

4. Comments on the process and Progress made:

- Sprint velocity: 7 days (sprint 3) – 7 days (sprint 5)= 0
