

Sprint 1 Retrospective meeting:

Date: 14 April 2021

Time: 15:00

Attendees: Ammarah Akhalwaya

Florance Thobejane

Oratile Marope

Nthabiseng Mapheelle

Thokozani Msezane

1. What went well:

- All tasks, user stories and developer stories were completed on time.
- Standard style code was followed and code structure looks cohesive.
- Good communication between team members was maintained throughout sprint 1.
- Pull request were done well and changes made were well explained.
- A usable product for the user was produced by end of sprint 1.

2. Problems Encountered

- No major issues in code breaking were encountered.
- Small integration issues/configuration issues with the data base were experienced but were solved in relatively short period.

3. Comments on the process and Progress made

- We can do better to explain the features/task we want to add and how they intergrate into the whole app functionality.
- A general poor descriptions of tasks and their acceptance criteria was experienced.
- The first sprint was completed in expected time (7 days)
- Pull request review methodology was altered to allow a minimum of one developer to review a pull request instead of the entire teams.
- Sprint velocity: The team elected to have sprint lengths of 7 days. And this target was met for the first sprint. (Sprint calculations will be made in the sprint retrospective for sprint 2 as we need a reference to compare with, since this is the first sprint it will serve as a reference for sprint 2)
