Sprint 7 Review meeting:

<u>Date</u>: 26 May 2021

<u>Time:</u> 20:45

<u>Attendees:</u> Ammaarah Akhalwaya

Oratile Marope

Florance Thobejane

Nthabiseng Mapheelle

Thokozani Msezane

1. *What went well:*
   - Sprint deadline was met.
   - Comprehensive pull requests were made in this sprint with comments on estimated effort and success criteria.
   - We were able to help each other debug logical errors on our respective tasks.
2. *Functionality Added:*
   - Included a confirm password field in the signup form and made sure that user passwords match upon registering.
   - Members of a particular group are displayed on the groups page.
   - Added a security feature that makes sure password are 8 characters long and contain at least 1 number and a capital letter.
   - Added functionality that ensures a group doesn't have more than 10 members.
   - Users can join any group of their choice by searching existing groups.
   - Users can request an online meeting.
3. *Problems Encountered and How they Were Solved:*
   - Problems using fetch and post, this will be solved in the sprint.
   - The initial scrum board did not have user stories on the sprint backlog, this was solved and will reflect in the final scrum board.
4. *Comments on the process and Progress made:*
   - Sprint velocity: 7 days (sprint 6) – 7 days (sprint 7) = 0
   - Made progress on the group functionality, searching and joining of existing groups.
   - Reduced the code in userRoutes by creating new routes and organising routes according to the functionality they achieve.
   - 8 More tests were added in this sprint.
